

## External VFO for ICOM IC-201

Based on a SDR-Kit ([http://sdr-kits.net/PAOKLT/PAOKLT\\_Manual.pdf](http://sdr-kits.net/PAOKLT/PAOKLT_Manual.pdf)) the external VFO was built in the case of an old VF-221, which is designed for an FM-transceiver IC-21A and therefore electrically not compatible with the IC-201.

An additional buffer amplifier is added for reducing harmonics and distortion of the SDR-output.
